

Sl. No.	Component	Function in System	Indicative Cost (₹)
1	Sipeed MaixCam (SG2002 processor)	Core embedded processing unit executing YOLOv11 inference, monocular distance estimation, and system control	₹1,900 – ₹2,700
2	Monocular RGB Camera (integrated)	Visual sensing for object detection and geometric distance estimation	Included
3	Rechargeable Li-Po Battery (3.7 V)	Portable energy storage enabling untethered wearable operation	₹80 – ₹270
4	Battery Charging Module (TP4056 with protection)	Safe charging, over-current and over-voltage protection for Li-Po battery	₹15 – ₹120
5	DC–DC Boost Converter (XL6009)	Voltage regulation to provide stable system supply from battery	₹40 – ₹450
6	Wired Earphones	Auditory feedback output for object and distance narration	₹50 – ₹450
7	Tactile Push Button	User control to toggle detection system ON/OFF	₹5 – ₹30
8	Status LED	Visual indication of system operational state	₹15 – ₹50
9	Custom Eyeglass Frame / 3D-Printed Housing	Mechanical mounting, alignment, and protection of electronics	₹100 – ₹1,000
